SUMMARY

Backend Engineer with hands-on experience building RESTful microservices and payment-processing systems in Java and Spring Boot. Skilled in Spring Data JPA, Hibernate, PostgreSQL, and concurrency-safe transaction design using optimistic locking and event-driven lifecycles. Experienced integrating third-party APIs (Stripe) and applying secure, 12-factor configuration practices. Foundational experience with AWS (EC2, S3) and Linux-based development environments.

TECHNICAL SKILLS

Languages: Java 21, Python, SQL

Frameworks & Libraries: Spring Boot, Spring Data JPA, Hibernate, Spring Security, Maven

Databases & Tools: PostgreSQL, MongoDB, Git, GitHub, Postman, Linux (Fedora)

Cloud & Infrastructure: AWS (EC2, S3)

Architecture & Concepts: RESTful API Design, Object-Relational Mapping (ORM), Optimistic Locking, Event-Driven Architecture, 12-Factor App Methodology, Payment Processing (Stripe API)

PROJECTS

MeshPay Backend System *[Java, Spring Boot, PostgreSQL, Hibernate]*
GitHub Repository

- Architected a digital payment routing and transaction-processing backend with Spring Boot and Spring Data JPA, exposing 10 RESTful endpoints with automated schema management via Hibernate.
- Implemented an event-driven startup lifecycle (ApplicationReadyEvent) for automated database seeding, and enforced strict concurrency safety across payment routing using optimistic locking (@Version).
- Enforced 12-Factor App methodology by externalizing all database credentials to environment variables, removing hardcoded secrets from configuration files.

NexCart E-Commerce API *[Java, Spring Boot 3, PostgreSQL, Stripe SDK, Spring Security]*
GitHub Repository

- Engineered a secure RESTful backend for an e-commerce platform using Spring Boot 3 and Spring Data JPA, modeling a relational schema across 6 entities/tables.
- Integrated the Stripe API to process checkout sessions and handle dynamic multi-currency conversion, supporting 2 payment flows.
- Designed authentication and authorization with Spring Security, protecting 12+ endpoints against unauthorized access.
- Implemented cart-state management and dynamic inventory validation logic, reducing duplicate-order errors through strict server-side checks.
- Secured application configuration and API credentials through strict environment-variable isolation, following container-ready deployment practices.

CERTIFICATIONS / AWARDS

Certificate Course on Data Analytics — ICT Academy & Capgemini (CSR Initiative), Dec 2024
Core focus: Data Analysis, Data Handling, Analytical Thinking

EDUCATION

Bachelor of Technology (B.Tech), Computer Science Engineering 2021 – 2025
R.D. Engineering College, Ghaziabad, UP

Higher Secondary (12th Grade) 2019 – 2021
T.R.M. Public School, Modinagar, UP

Secondary School (10th Grade) 2017 – 2019
T.R.M. Public School, Modinagar, UP
